**Novel physiological and metabolic insights into the
beneficial gut microbe *Faecalibacterium prausnitzii***

From carbohydrates to current

M.Tanweer Khan

The work described in this thesis was conducted at the Department of Medical Microbiology, University of Groningen, University Medical Center Groningen, The Netherlands.

The work was financially supported by University of Groningen, University Medical Center Groningen and Groningen University Institute for Drug Explorations (GUIDE).

Printing of this thesis was financially supported by:

University Medical Center Groningen, University of Groningen

Groningen University Institute for Drug Explorations (GUIDE)

Cover: Hypothetical presentation of extracellular electron transfer and current production by *F. prausnitzii* in the gut lumen using carbohydrate and flavins as an electron donor and redox mediator respectively.

By M. Tanweer Khan.

Contents

Chapter 1	Introduction and scope of the thesis	09
Chapter 2	Classical but effective procedure for the isolation and cultivation of <i>Faecalibacterium prausnitzii</i> and other microbes of the human gut: New wine in old bottle? <i>Manuscript in preparation</i>	39
Chapter 3	Cultured representatives of two major phylogroups of human colonic <i>Faecalibacterium prausnitzii</i> can utilize pectin, uronic acids, and host-derived substrates for growth. <i>Appl Environ Microbiol. 2012; 78(2): 420-8</i>	55
Chapter 4	The gut anaerobe <i>Faecalibacterium prausnitzii</i> uses an extracellular electron shuttle to grow at oxic-anoxic interphases. <i>ISME J. 2012; 6(8):1578-85</i>	87
Chapter 5	How can <i>Faecalibacterium prausnitzii</i> employ riboflavin for extracellular electron transfer? <i>Antioxid Redox Signal. 2012 15; 17 (10):1433-40</i>	111
Chapter 6	Metabolic switch upon transition from an electrogenic phase to fermentation in the human gut bacterium <i>Faecalibacterium prausnitzii</i> . <i>Submitted to Energy Environ. Sci</i>	131
Chapter 7	How to keep the potentially probiotic human gut bacterium <i>Faecalibacterium prausnitzii</i> alive at ambient air? <i>Patent number: 12190948.5-2114</i> <i>Submitted to Antioxid Redox Signal</i>	165
Chapter 8	General discussion and future perspective	183
Chapter 9	Nederlandse samenvatting	201
	Acknowledgements	211
